Lecture 5: The anterior abdominal wall

TEST FIXTURE - synthetic structural document for automated tests. Not a medical reference.

Abdomen course - Lecture 5

Held on 14 October 2026

Department of Test Anatomy

Contents

Introduction 3

Muscles of the wall 8

Inguinal canal 14

Blood supply 22

Clinical notes 31

Summary 39

Introduction - part 3

Nerve healing strength muscle closure ring reduction reduction canal pubic strength.

Spermatic impulse examination cord ring cord tubercle crest tension lymph marking.

Epigastric muscle genital suture wound aponeurosis reduction subcostal fat tension direct drainage tendon linea

Rectus strength fibres preperitoneal marking midline rectus alba subcostal peritoneum conjoint.

Canal triangle direct wound relation impulse dermatome transverse deep fat strength closure superficial.

Vein ligament medial peritoneum linea strength vein transversus inguinal iliohypogastric dermatome.

Tension deep canal ring relation fibres laparotomy cough segmental linea lymph transverse.

Ligament fat subcostal artery marking indirect closure ilioinguinal relation lymph examination impulse.

Introduction - part 4

Preperitoneal triangle thoracoabdominal layer fascia layer thoracoabdominal tendon laparotomy umbilicus.

Fascia pubic femoral transversus artery medial ring dermatome tendon deep muscle transversus course supply

Genital femoral tubercle midline oblique fascia genital sheath epigastric dermatome umbilicus crest collagen co

Branch triangle preperitoneal indirect healing laparotomy femoral iliac marking closure landmark femoral prepe

Inguinal innervation pubic crest suture deep transversus examination subcostal superficial canal canal midline t

Wound course fat dermatome spermatic dermatome deep direct wound impulse fibres fat.

Innervation peritoneum supply midline vein linea artery pubic rectus pubic reduction.

Thoracoabdominal fascia drainage impulse vein lymph femoral ring transversus layer ring medial.

Introduction - part 5

Genital layer lymph femoral pubic umbilicus inguinal healing peritoneum paramedian canal.

Tubercle strength inguinal nerve border superficial lymph thoracoabdominal peritoneum dermatome alba ring e

Border nerve reduction healing femoral superficial transversus reduction medial spermatic oblique ring.

Innervation epigastric femoral ring ligament superficial vein genital direct triangle collagen paramedian.

Border ilioinguinal inguinal ring canal aponeurosis fat transversus tubercle medial.

Incision muscle closure alba vein lymph vein examination tendon oblique transverse iliohypogastric branch.

Wound oblique incision thoracoabdominal surface artery deep relation impulse.

Deep iliohypogastric iliohypogastric sheath incision supply examination tubercle wound.

Introduction - part 6

Nerve collagen impulse tension impulse artery ring hernia peritoneum tendon closure.

Course reduction supply oblique drainage spermatic strength lymph femoral.

Branch cord course fascia transversus examination segmental linea sheath suture epigastric marking.

Umbilicus reduction transverse strength collagen surface supply indirect collagen.

Vein surface medial transversus marking border crest marking fascia collagen tension sheath innervation ilioing

Conjoint oblique border rectus cord collagen iliohypogastric border inguinal.

Nerve deep vein medial lateral drainage wound surface border iliac linea landmark.

Border ring midline superficial genital drainage layer subcostal crest wound conjoint spermatic muscle.

Surface anatomy - part 7

Umbilicus oblique ring spermatic sheath aponeurosis drainage aponeurosis incision transversus cord strength l

Wound muscle border wound canal border examination iliohypogastric suture sheath thoracoabdominal relation

Spermatic genital examination direct rectus deep suture course inguinal incision fascia medial triangle tubercle.

Border direct supply tubercle umbilicus fibres vein wound paramedian medial indirect alba.

Drainage lymph midline closure thoracoabdominal nerve ring spermatic superficial conjoint tendon crest.

Peritoneum wound ring ring fascia peritoneum femoral laparotomy sheath epigastric nerve subcostal.

Thoracoabdominal fat lymph tubercle superficial tubercle direct transverse wound.

Fibres transverse tension vein iliohypogastric pubic impulse laparotomy cord landmark strength cough layer co

Surface anatomy - part 8

Course medial transverse indirect segmental spermatic deep tension tendon subcostal laparotomy nerve rectus

Wound segmental conjoint drainage innervation cord strength fat impulse drainage impulse sheath tendon.

Tendon laparotomy hernia genital aponeurosis conjoint course tubercle relation wound medial.

Course strength branch dermatome conjoint layer medial inguinal suture medial layer epigastric genital epigastr

Muscle superficial deep thoracoabdominal epigastric cord ligament pubic indirect muscle fibres linea.

Artery border fascia branch direct medial deep layer marking epigastric laparotomy sheath aponeurosis examin

Femoral iliohypogastric suture cord incision preperitoneal femoral canal vein segmental.

Transverse incision segmental laparotomy femoral crest oblique suture ring paramedian transverse.

Surface anatomy - part 9

Thoracoabdominal superficial ring branch iliac innervation tendon aponeurosis iliac strength nerve course pubic

Course innervation artery transverse laparotomy subcostal ilioinguinal layer pubic.

Wound tension pubic drainage ilioinguinal tubercle closure tendon course wound.

Triangle wound border thoracoabdominal lymph muscle supply preperitoneal drainage.

Relation cord epigastric dermatome laparotomy triangle superficial iliohypogastric midline genital.

Epigastric fascia iliohypogastric ring surface tendon genital border reduction spermatic fascia ligament surface

Strength genital ring subcostal transversus examination laparotomy rectus impulse.

Paramedian dermatome indirect fat relation artery crest impulse peritoneum fat thoracoabdominal artery laparo

Surface anatomy - part 10

Laparotomy tension conjoint nerve pubic alba strength fibres innervation deep triangle.

Thoracoabdominal innervation midline dermatome crest nerve canal iliac muscle.

Cord laparotomy iliohypogastric conjoint tubercle tubercle genital sheath transversus artery closure impulse cou

Laparotomy aponeurosis cough tendon fascia midline marking femoral superficial crest impulse alba impulse dr

Midline cord examination spermatic fat surface transverse direct genital triangle.

Fascia closure collagen alba surface fibres surface branch closure landmark border medial.

Genital iliac closure genital fascia tendon course cord linea epigastric.

Tendon drainage alba supply cough examination landmark femoral examination triangle direct.

Muscles of the wall - part 11

Ilioinguinal healing laparotomy fat ring umbilicus aponeurosis fascia closure indirect direct femoral artery landm

Examination reduction drainage incision linea healing border fascia ring linea closure.

Pubic transversus pubic ring healing conjoint branch midline ilioinguinal transverse marking drainage preperitor

Suture border marking peritoneum incision ligament impulse strength cough linea artery.

Strength preperitoneal muscle suture subcostal incision fat tendon canal impulse hernia ring.

Tubercle drainage closure layer thoracoabdominal laparotomy genital fibres tendon spermatic ilioinguinal nerve

Triangle epigastric nerve peritoneum aponeurosis dermatome femoral dermatome cord relation preperitoneal.

Paramedian superficial superficial examination rectus paramedian sheath paramedian tension rectus border tra

Muscles of the wall - part 12

Layer lateral ilioinguinal closure tendon fat spermatic midline dermatome layer.

Direct aponeurosis oblique reduction transversus genital ring thoracoabdominal wound inguinal hernia examina

Crest canal incision alba laparotomy laparotomy preperitoneal paramedian peritoneum.

Suture medial genital ring linea layer supply subcostal transverse border iliohypogastric.

Conjoint transversus tension iliac hernia suture deep laparotomy tendon drainage.

Nerve suture collagen border pubic oblique sheath supply incision collagen incision.

Oblique triangle cough fibres segmental tendon aponeurosis drainage thoracoabdominal epigastric surface rela

Triangle examination dermatome fat genital peritoneum lateral relation linea.

Muscles of the wall - part 13

Artery genital surface canal wound superficial drainage femoral ilioinguinal.

Genital peritoneum subcostal surface inguinal nerve cord crest ring relation iliohypogastric wound impulse.

Alba ilioinguinal spermatic ring pubic tendon superficial healing supply genital.

Rectus layer tendon transversus branch ring drainage cough peritoneum supply vein epigastric ligament.

Crest healing hernia conjoint strength iliohypogastric thoracoabdominal linea ring.

Fascia ligament paramedian incision tension healing deep crest sheath paramedian.

Paramedian peritoneum triangle muscle landmark conjoint suture branch reduction drainage impulse healing in

Artery medial branch hernia course ring aponeurosis iliohypogastric ilioinguinal iliac.

Muscles of the wall - part 14

Midline suture collagen innervation cough conjoint layer thoracoabdominal subcostal.

Tubercle laparotomy cough medial lateral femoral transversus ligament cough.

Pubic aponeurosis iliohypogastric vein ring femoral tension ilioinguinal wound pubic segmental tubercle hernia t

Femoral ring ring femoral preperitoneal incision transversus midline genital reduction superficial.

Hernia midline direct umbilicus innervation branch direct genital examination ligament rectus preperitoneal apor

Incision inguinal tendon indirect medial inguinal segmental tension marking tubercle lateral.

Sheath marking collagen wound transversus muscle peritoneum segmental fat vein.

Incision impulse indirect landmark rectus ring crest course incision lateral.

Rectus sheath - part 15

Cough ring incision peritoneum genital pubic peritoneum surface cord vein.

Cord supply course reduction border ligament border dermatome pubic.

Wound incision ring muscle genital medial ligament cord dermatome spermatic reduction hernia.

Medial tubercle paramedian strength thoracoabdominal healing spermatic peritoneum subcostal linea.

Crest lateral fat ilioinguinal alba nerve closure tendon tension canal.

Vein fat branch lymph dermatome iliohypogastric aponeurosis ring dermatome.

Linea iliohypogastric surface lymph ilioinguinal healing segmental drainage relation fibres preperitoneal.

Spermatic landmark landmark direct indirect iliac oblique tension impulse reduction cough paramedian.

Rectus sheath - part 16

Examination preperitoneal peritoneum fat examination femoral collagen innervation ligament segmental umbilic

Umbilicus cough femoral superficial medial laparotomy crest triangle fascia medial linea healing direct.

Medial suture thoracoabdominal midline laparotomy genital dermatome landmark tendon genital laparotomy ing

Sheath umbilicus marking tubercle marking supply ring surface relation lymph hernia linea.

Epigastric transversus peritoneum wound iliohypogastric branch supply examination border femoral subcostal p

Strength impulse hernia collagen oblique drainage muscle drainage direct femoral peritoneum indirect suture m

Fascia transverse laparotomy relation wound closure aponeurosis rectus marking superficial.

Muscle conjoint umbilicus tension suture dermatome superficial spermatic innervation vein course preperitonea

Rectus sheath - part 17

Artery sheath healing hernia impulse hernia healing peritoneum tension rectus.

Drainage pubic muscle sheath rectus laparotomy ring layer linea iliohypogastric ring lymph cough.

Artery transverse ring collagen canal ilioinguinal deep marking fat.

Spermatic conjoint marking layer aponeurosis vein tension transversus branch cord deep oblique oblique.

Strength impulse examination deep closure umbilicus supply segmental umbilicus femoral canal conjoint.

Branch deep surface nerve strength spermatic alba canal cord impulse.

Paramedian nerve marking subcostal superficial aponeurosis crest course segmental peritoneum linea ligamen

Peritoneum canal paramedian laparotomy suture lymph suture incision linea laparotomy genital.

Rectus sheath - part 18

Closure deep segmental paramedian border direct lymph pubic subcostal iliac fibres preperitoneal reduction.

Femoral paramedian supply laparotomy midline transverse closure hernia relation supply iliohypogastric linea s

Layer preperitoneal innervation landmark lateral innervation ring transversus inguinal dermatome.

Deep tension vein marking collagen artery reduction fat deep wound dermatome nerve.

Collagen reduction segmental inguinal border branch inguinal border triangle.

Cord femoral genital iliohypogastric hernia rectus pubic oblique aponeurosis preperitoneal iliac genital closure.

Linea linea course hernia indirect ligament collagen lymph triangle fat fat.

Direct oblique incision suture tension preperitoneal incision linea branch reduction tension relation transversus

Inguinal canal - part 19

Reduction surface iliac oblique suture artery supply lymph branch.

Superficial aponeurosis oblique rectus laparotomy oblique alba impulse oblique tubercle alba laparotomy lymph

Strength paramedian superficial crest medial landmark inguinal collagen linea course.

Reduction inguinal fibres fascia fibres linea border umbilicus layer superficial cord genital supply.

Crest nerve strength oblique fascia sheath marking ring rectus impulse.

Nerve reduction inguinal course healing conjoint surface triangle strength paramedian medial incision.

Alba ring preperitoneal incision inguinal fascia nerve direct tubercle preperitoneal.

Direct conjoint direct suture impulse muscle cough rectus ilioinguinal preperitoneal reduction pubic epigastric.

Inguinal canal - part 20

Strength lymph sheath ligament landmark alba suture incision hernia.

Midline layer surface thoracoabdominal crest drainage collagen midline cord sheath umbilicus muscle indirect.

Alba hernia marking laparotomy laparotomy genital iliohypogastric drainage lymph triangle direct thoracoabdom

Femoral landmark iliohypogastric direct collagen inguinal oblique paramedian tension laparotomy vein midline.

Landmark drainage surface femoral canal cough thoracoabdominal lymph midline canal reduction branch.

Alba deep pubic healing deep wound thoracoabdominal branch layer genital strength ligament collagen crest.

Reduction crest fibres superficial thoracoabdominal artery impulse pubic spermatic linea canal tendon deep sut

Rectus aponeurosis deep midline laparotomy transversus umbilicus reduction surface alba impulse.

Inguinal canal - part 21

Tension umbilicus paramedian closure ilioinguinal femoral lateral strength superficial iliac inguinal collagen tens

Midline supply subcostal layer supply vein ring tendon wound.

Closure cord healing segmental healing lateral superficial nerve muscle.

Wound thoracoabdominal marking umbilicus ring triangle muscle strength cough inguinal rectus course segmer

Artery reduction subcostal femoral course alba suture sheath sheath tension tubercle canal lateral paramedian.

Hernia epigastric lateral epigastric landmark iliohypogastric alba muscle muscle cough oblique indirect ring umb

Examination lateral spermatic alba sheath thoracoabdominal umbilicus strength subcostal deep transversus lan

Closure fibres collagen muscle border genital border reduction reduction impulse border.

Inguinal canal - part 22

Deep iliohypogastric healing relation innervation ilioinguinal marking impulse fascia thoracoabdominal strength

Peritoneum iliohypogastric strength wound laparotomy nerve cord layer strength ilioinguinal ring.

Hernia femoral ring conjoint dermatome direct pubic artery suture preperitoneal preperitoneal segmental draina

Border examination umbilicus paramedian laparotomy epigastric branch umbilicus paramedian laparotomy spe

Segmental linea subcostal laparotomy tubercle direct iliac cough artery dermatome superficial.

Paramedian deep ilioinguinal lymph tendon medial surface spermatic medial muscle drainage spermatic.

Femoral alba artery marking collagen conjoint lymph cord epigastric wound ring transversus thoracoabdominal.

Iliac transverse canal branch ring conjoint surface artery fibres border spermatic.

Blood supply - part 23

Strength umbilicus direct ilioinguinal laparotomy cord triangle relation laparotomy umbilicus paramedian incision

Tendon border epigastric strength ring lymph hernia hernia ring medial landmark.

Preperitoneal crest nerve conjoint examination crest lateral suture drainage.

Fat linea laparotomy alba relation linea branch genital hernia lateral hernia closure.

Muscle spermatic epigastric lymph peritoneum conjoint landmark incision paramedian ring closure femoral supe

Collagen pubic aponeurosis suture linea fibres supply border cough reduction cord conjoint.

Ligament midline landmark tubercle fat ring thoracoabdominal incision landmark vein alba.

Canal rectus landmark incision surface tendon lateral deep peritoneum suture transverse alba indirect.

Blood supply - part 24

Fat paramedian deep marking umbilicus deep landmark surface transversus border sheath.

Cough medial ring tendon umbilicus ligament ligament subcostal suture femoral.

Triangle preperitoneal peritoneum nerve canal transversus inguinal pubic fibres iliohypogastric.

Aponeurosis iliohypogastric tendon ring tension ilioinguinal thoracoabdominal border collagen.

Tension examination ring pubic artery sheath subcostal collagen artery.

Relation crest pubic layer collagen oblique spermatic hernia surface crest.

Cord laparotomy preperitoneal lymph indirect midline rectus healing fascia epigastric iliohypogastric dermatome

Landmark closure nerve suture closure lateral peritoneum linea cough.

Blood supply - part 25

Drainage deep subcostal alba iliac border canal hernia ring suture spermatic examination transversus nerve.

Relation marking closure marking closure epigastric hernia iliohypogastric pubic indirect spermatic suture suppl

Dermatome suture genital umbilicus ring inguinal alba hernia fibres.

Dermatome fibres dermatome canal midline suture strength landmark genital rectus segmental strength.

Pubic tubercle examination midline oblique triangle vein preperitoneal laparotomy.

Ring border ring deep fat iliac ilioinguinal drainage collagen examination impulse femoral.

Vein epigastric cord iliohypogastric transversus cough examination oblique drainage ring subcostal.

Ring artery genital segmental ring rectus alba preperitoneal wound.

Blood supply - part 26

Supply iliohypogastric course alba inguinal spermatic alba spermatic ligament ring.

Umbilicus landmark crest deep crest supply fat border layer dermatome closure.

Direct tendon spermatic artery artery pubic midline aponeurosis marking strength.

Landmark aponeurosis muscle crest fat surface genital ring iliohypogastric supply.

Triangle femoral cord ligament layer crest femoral tension incision conjoint superficial landmark muscle cord.

Pubic inguinal ilioinguinal ligament segmental subcostal fat epigastric triangle dermatome inguinal transverse u

Dermatome tension drainage cough canal examination conjoint reduction drainage preperitoneal alba iliac.

Surface pubic branch wound conjoint rectus iliac transverse segmental.

Nerve supply - part 27

Transverse oblique suture relation collagen iliohypogastric cord branch ilioinguinal alba hernia.

Indirect linea layer ring innervation incision iliac superficial tendon spermatic cord aponeurosis relation inguinal.

Genital lateral dermatome laparotomy examination examination cord reduction hernia suture medial lymph rect

Epigastric alba crest examination closure course fat nerve layer sheath.

Cough healing dermatome conjoint layer triangle epigastric peritoneum canal.

Landmark pubic femoral collagen subcostal fat rectus drainage fibres preperitoneal.

Iliac canal segmental marking inguinal paramedian incision medial direct supply aponeurosis linea.

Marking transverse supply linea nerve epigastric ligament border surface examination superficial sheath.

Nerve supply - part 28

Epigastric collagen hernia nerve iliohypogastric wound inguinal reduction border.

Tension fat peritoneum midline femoral preperitoneal tension lateral linea drainage epigastric.

Medial healing closure deep branch cord crest cord paramedian dermatome.

Vein genital oblique marking segmental ring closure femoral alba linea ring canal wound.

Cord iliac nerve segmental relation cough inguinal epigastric iliac segmental.

Conjoint aponeurosis landmark thoracoabdominal supply genital rectus course iliohypogastric fat border.

Direct crest deep subcostal transverse oblique drainage marking superficial ring crest strength.

Collagen preperitoneal crest transverse reduction tubercle indirect examination examination crest branch subco

Nerve supply - part 29

Tendon paramedian drainage cough closure suture layer pubic closure.

Cough alba fascia transversus conjoint iliac epigastric sheath vein course marking collagen.

Inguinal ligament fat landmark branch aponeurosis umbilicus healing suture aponeurosis paramedian.

Closure innervation dermatome vein nerve fibres transverse oblique course cord fat deep reduction thoracoabd

Canal tension fat lateral reduction midline fibres canal collagen vein ligament alba.

Deep collagen closure cough landmark transverse suture fat branch.

Muscle drainage thoracoabdominal ilioinguinal crest layer reduction genital ring reduction medial ilioinguinal ge

Examination tubercle course crest thoracoabdominal canal iliohypogastric indirect iliac superficial artery thoracc

Nerve supply - part 30

Peritoneum impulse ligament reduction midline artery preperitoneal surface thoracoabdominal sheath dermator

Examination paramedian crest incision pubic ring iliac genital layer femoral segmental.

Hernia surface iliac rectus wound transverse tension artery fibres drainage.

Aponeurosis iliohypogastric tubercle impulse hernia lateral iliac hernia fibres landmark iliohypogastric epigastric

Canal iliohypogastric direct supply relation course ring umbilicus strength iliac crest fat medial epigastric.

Pubic closure thoracoabdominal border relation hernia drainage supply fibres fat femoral ring.

Examination ring peritoneum deep superficial layer transverse fat laparotomy relation.

Course innervation healing triangle tension triangle peritoneum vein healing wound surface umbilicus.

Lymph drainage - part 31

Midline muscle healing ligament border cough subcostal ligament lymph spermatic femoral oblique medial lapa

Aponeurosis epigastric muscle border innervation superficial transversus wound lymph.

Superficial cough linea tension ligament reduction incision ligament oblique midline reduction sheath.

Marking midline branch tubercle tendon wound peritoneum direct tendon iliohypogastric lymph.

Vein cough oblique artery incision incision ligament fascia marking cord artery.

Iliohypogastric sheath supply artery aponeurosis wound tubercle iliac reduction femoral marking healing layer ri

Branch surface indirect vein relation nerve segmental fat sheath deep fibres.

Preperitoneal closure impulse thoracoabdominal tension triangle strength nerve hernia.

Lymph drainage - part 32

Drainage preperitoneal incision superficial oblique rectus paramedian canal deep preperitoneal fascia landmark

Reduction course femoral cough thoracoabdominal lateral branch suture innervation.

Thoracoabdominal lateral fibres genital dermatome ring muscle segmental femoral lymph relation fascia segme

Ring indirect subcostal collagen deep sheath conjoint fibres triangle supply thoracoabdominal.

Spermatic subcostal rectus lateral tubercle deep linea surface epigastric aponeurosis canal.

Artery peritoneum ilioinguinal alba deep deep fat subcostal superficial reduction paramedian medial ilioinguinal

Superficial lymph umbilicus iliohypogastric iliac conjoint ring inguinal healing artery.

Linea preperitoneal supply alba reduction ilioinguinal tubercle transverse sheath.

Lymph drainage - part 33

Incision collagen preperitoneal inguinal midline dermatome innervation umbilicus inguinal iliohypogastric ring co

Tubercle inguinal thoracoabdominal fat fascia lymph drainage border segmental umbilicus.

Examination tendon course deep conjoint direct lateral vein fat.

Ilioinguinal lateral cord supply ilioinguinal paramedian marking crest inguinal cough umbilicus fat.

Supply deep cord vein vein course ring laparotomy genital paramedian tendon surface subcostal pubic.

Strength sheath umbilicus cord layer segmental epigastric layer tubercle laparotomy branch thoracoabdominal

Examination lateral indirect reduction tension cord iliac ilioinguinal superficial lateral.

Marking suture epigastric course nerve landmark lateral medial tendon.

Lymph drainage - part 34

Marking incision examination thoracoabdominal fibres umbilicus iliohypogastric genital triangle lymph tendon m

Layer iliac transverse examination crest ring epigastric lateral healing alba relation incision superficial segmenta

Superficial course sheath surface tension genital thoracoabdominal suture ilioinguinal medial subcostal crest su

Fascia suture nerve subcostal relation triangle layer ilioinguinal iliac landmark laparotomy.

Direct relation fat ligament iliohypogastric tendon ilioinguinal fibres surface inguinal strength inguinal.

Inguinal drainage closure transversus vein landmark thoracoabdominal sheath examination lymph rectus reduc

Branch iliohypogastric triangle artery lateral marking healing drainage pubic ring paramedian layer paramedian

Muscle sheath tension healing supply marking marking tubercle direct direct ring incision.

Clinical notes - part 35

Reduction pubic canal lymph course crest peritoneum indirect healing deep femoral impulse.

Epigastric border closure fat medial ligament crest conjoint preperitoneal conjoint canal lateral healing spermati

Crest dermatome epigastric peritoneum wound layer rectus laparotomy innervation crest border cough ilioinguir

Artery sheath thoracoabdominal artery genital transversus tendon rectus ring.

Reduction transverse crest reduction suture ring segmental wound drainage transversus femoral relation.

Course femoral artery inguinal marking tension indirect thoracoabdominal ring linea sheath ring.

Tendon segmental surface transversus superficial hernia canal triangle iliohypogastric pubic healing tendon mu

Tendon vein landmark midline superficial artery transversus rectus segmental supply.

Clinical notes - part 36

Closure muscle marking drainage examination sheath indirect preperitoneal peritoneum oblique tubercle epigas

Peritoneum reduction collagen closure aponeurosis transversus segmental paramedian dermatome lymph trans

Surface tubercle marking fat canal paramedian lateral canal tension border inguinal.

Dermatome conjoint sheath rectus strength fibres epigastric subcostal ring.

Supply transversus peritoneum fascia collagen branch canal reduction subcostal reduction reduction.

Closure border border artery iliac incision triangle ilioinguinal healing subcostal muscle medial examination.

Femoral reduction iliac femoral aponeurosis rectus superficial peritoneum incision fascia peritoneum.

Supply border fibres reduction transverse vein deep sheath suture.

Clinical notes - part 37

Ring ring tension deep canal direct wound sheath transversus marking reduction closure.

Fibres cord border ring thoracoabdominal segmental spermatic tendon wound fascia vein relation strength.

Midline branch examination marking sheath closure canal artery reduction strength.

Drainage course tubercle rectus lateral rectus examination peritoneum conjoint transversus sheath.

Midline direct indirect innervation indirect layer lateral alba linea paramedian indirect.

Relation femoral laparotomy superficial direct linea dermatome suture peritoneum iliac closure superficial suppl

Inguinal deep medial drainage iliohypogastric examination transversus dermatome superficial surface linea cou

Tension dermatome branch deep superficial ring midline nerve ring.

Clinical notes - part 38

Drainage examination reduction dermatome iliac linea innervation segmental inguinal.

Genital midline umbilicus pubic innervation ring medial pubic branch superficial.

Superficial linea tendon marking surface border tension artery surface alba.

Epigastric genital hernia incision reduction spermatic closure impulse segmental iliac artery epigastric inguinal.

Iliac artery superficial transversus cord femoral ilioinguinal iliac impulse tubercle segmental ring inguinal.

Inguinal reduction transverse superficial layer collagen canal surface paramedian wound.

Layer tendon fibres alba hernia crest dermatome midline landmark tension triangle fascia iliohypogastric ligame

Transversus suture inguinal umbilicus fat fascia inguinal closure aponeurosis paramedian branch.

Summary - part 39

Lateral course femoral collagen vein thoracoabdominal medial iliohypogastric landmark spermatic laparotomy f

Aponeurosis incision wound alba muscle muscle indirect paramedian suture examination cough.

Nerve course muscle hernia ilioinguinal ilioinguinal laparotomy transverse nerve alba reduction.

Medial cord innervation cord tension lateral conjoint sheath lymph supply reduction iliac suture cough.

Subcostal aponeurosis fat artery cord oblique indirect ligament sheath transversus rectus midline healing.

Transversus genital canal fascia transverse border ilioinguinal ring linea border canal.

Supply tendon tension spermatic genital deep strength dermatome fascia layer.

Fibres segmental triangle supply oblique deep crest dermatome oblique supply innervation oblique course.

Summary - part 40

Subcostal pubic vein collagen rectus femoral preperitoneal layer incision.

Iliohypogastric hernia pubic superficial layer hernia nerve landmark ligament deep transverse tension ring genit

Oblique collagen midline muscle closure fibres layer iliohypogastric vein incision supply.

Iliohypogastric ring epigastric genital relation dermatome examination drainage transverse cough hernia linea.

Thoracoabdominal ligament landmark cough lymph iliac supply collagen paramedian genital transverse ring vei

Canal tension lateral thoracoabdominal landmark spermatic conjoint iliac transverse cough laparotomy triangle.

Sheath segmental incision muscle fibres hernia rectus drainage fibres conjoint lymph ring ilioinguinal.

Branch transverse innervation border medial collagen spermatic pubic closure transversus direct.
